

# St Michael's Church in Great Gidding

## Temporary Church Closure

During internal renovations to the church, due to hazard generated by lime plaster dust, it has been necessary to close St Michael's church temporarily.

As you can see from the pictures, there would also be considerable access problems because of scaffolding and the general working environment.

All being well, we hope that the church will re-open during the second week in November. However, that is dependant on the builders not finding further faults in the structure when the existing plaster is removed.

We will keep this page updated with the latest news on progress and any new re-opening date.

For any enquiries, please contact the churchwardens, whose details may be found on the [contact page](#).
